### **Rocky Research Awarded Lockheed Martin Contract for Light Weight Composite Heat Shield and Armor Material “COMBAM”**

BOULDER CITY, NV - HUNTSVILLE, AL (January 15, 2010) - Rocky Research, a leader in thermal and energy management solutions utilizing their patented complex compound technologies, has been awarded a \$603,000 subcontract from Lockheed Martin in Grand Prairie, Texas for the development of a light weight composite heat shield and armor material “COMBAM” for use with Insensitive Munitions.

“Rocky Research’s COMBAM has the potential to be an integral part of our solution” as indicated by Joe Wright, Lockheed Martin Program Manager.

“We feel we have only scratch the surface of potential applications for COMBAM and are very excited to participate with Lockheed Martin’s on their innovative application” stated Dr. Uwe Rockenfeller, Rocky Research’s President/CEO.

#### **About Rocky Research**

Rocky Research has a long history of solving thermal problems across an incredibly broad range of commercial, industrial, and defense applications. With facilities in Boulder City, Nevada, and Huntsville, Alabama, Rocky Research is home to a dedicated group of scientists, engineers, technicians and support personnel. The Boulder City facility offers prototype development, testing and analytical services. The Huntsville facility offers prototype assembly as well as production and integration of commercial, industrial, or military high-density electronic systems utilizing Rocky Research’s advanced thermal management approaches and devices.
