Rocky Research Granted Patent for ‘Penetration Resistant Composite’

Boulder City, NV - Huntsville, AL (April 23, 2010) - Rocky Research, a leader in thermal and energy management solutions and provider of commercial, industrial, and military products has been granted US Patent 7,648,757 B2 by the United States Patent and Trademark Office for ‘Penetration Resistant Composite’. Rocky Research holds numerous patents related to complex compound and thermal management technologies supporting a broad range of markets from commercial HVAC to military applications. “We feel strongly this material can offer improvements in performance and weight reductions for numerous armor applications” stated Rocky Research’s CEO Uwe Rockenfeller.

Rocky Research continues to support the Aviation & Missile Research, Development & Engineering Center (AMRDEC) in Huntsville, Alabama researching endothermic and ballistic resistant materials.

About Rocky Research

Rocky Research has a long history of solving thermal problems across an incredibly broad range of commercial, industrial, and defense applications. With facilities in Boulder City, Nevada, and Huntsville, Alabama, Rocky Research is home to a dedicated group of scientists, engineers, technicians and support personnel. The Boulder City facility offers prototype development, testing and analytical services. The Huntsville facility offers prototype assembly as well as production and integration of commercial, industrial, or military high-density electronic systems utilizing Rocky Research’s advanced thermal management approaches and devices.
