5-Ton High Efficiency Air Conditioner / ECU

Utilizing Rocky Research's patented HVAC technologies along with readily available commercial-off-the-shelf components, the **ECU06001** offers a highly reliable design ready to address the rigors of harsh military environments. Providing up to 30% energy efficiency when compared to conventional military ECUs, Rocky Research's **ECU06001** offers a 60,000 BTU/hr load adaptive cooling capacity at 125°F.

Operating from either 50 or 60 Hz power sources, Rocky Research's **ECU6001** offers soft start and thereby avoids in-rush current resulting in smaller generator size requirement and higher compressor reliability. Rocky Research **ECU06001** is fully operational up to 125°F ambient temperature.

Designed for military environments and operational system reliability Rocky Research's **ECU06001** also offers the benefits of lower ambient noise while being simple to service and operate with straightforward and intuitive controls. Remote software control capability utilizing UDP/IP, RS-485, ModBus RTU (via RS-485 or TCP/IP), or CANBUS protocols.
